

ORANGE PIT bv

StrongCat 10.0

The OrangePit StrongCat 10.0 is a fast, all weather aluminum workboat which is sturdy build and can be equipped with stern drive or water jet propelled by Yanmar inboard diesel engines

With its closed steering cabin this boat can be used in all weather and cold and hot climates. The cabin can be climatized for working in hot or cold climates and custom designed for your required application like for example bathymetrical survey. Being completely self draining the workboat is virtually maintenance free and is used for all required marine work around your small to medium dredging operations like fast crew transfers, survey (optional moonpool), patrolling, etc.

Standard this workboat comes with dual inboard Yanmar diesel stern drives, open cooling, fixed fuel tank, six bolders, 4 lifting eyes, hydraulic steering, navigation lights, work lights, closed cabin, etc. Based on your specific requirements we can design and build you any option you require like waterjet propulsion, A-frame, winches, etc.

All our workboats come with required classification, detailed documentation, completely outfitted to start work and are build keeping in mind good seamanship, low and accessible maintenance and the KISS principle.

Standard Specifications:

Length over all	: 10.0 m
Width over all	: 3.80 m
Min. freeboard	: 0,85 m
Weight dry ship approx.	: 4.000 kg
Hull material	: Seawater resistant aluminium
Power source	: 2x Yanmar 240 Hp
Sterndrives	: 2x Yanmar
Fuel supply tanks	: total 500 Ltr
Draft	: ~70 cm (dep. load)

Advantages:

- Allround and economical, build to last, work boat for your al weather maritime operation.
- Built to the highest safety standards.
- Build extremely heavy and sturdy for 24/7 hard use.
- Transport by truck or container possible
- Flexible and custom made design.
- Multiple engine options based on your requirements
- Proven technology ideal for remote operations
