

ORANGE PIT bv

StrongWorker 6.0

The OrangePit StrongWorker 6.0 is a fast aluminum workboat which is sturdy build and can be equipped with in-board diesel engine or outboard petrol / diesel engine.

The boat is self draining and virtually maintenance free and is used for all required marine work around your small to medium dredging operations like patrolling, inspections, crew transfers, survey (optional moonpool), etc.

Standard this workboat comes with a single outboard Suzuki with fixed fuel tank, four bolders, 4 lifting eyes, steering console, hydraulic steering, navigation lights, work lights, etc. Based on your specific requirements we can design and build you multiple options you require like diesel outboard engines, survey set up, etc.

All our workboats come with required classification, detailed documentation, completely outfitted to start work and are build keeping in mind good seamanship, low and accessible maintenance and the KISS principle.

Standard Specifications:

Length over all	: 6.00 m
Width over all	: 2.15 m
Crawling height console	: 1,05 m
Weight (hull) approx.	: 600 kg
Hull material	: seawater resistant aluminium
Standard power source	: Suzuki outboard 40-150 hp
Diesel propulsion	: Yanmar inboard 50 hp
Fuel supply tanks	: total 80 Ltr
Draft	: ~30 cm (dep. load)

Advantages:

- Allround and economical, build to last, work boat for your maritime operation
- Built to the highest safety standards.
- Build extremely heavy and sturdy for 24/7 hard use.
- Transport by truck or container possible
- Flexible and custom made design.
- Multiple engine options based on your requirements
- Proven technology ideal for remote operations
